To Jim Gray (Microsoft Technical Fellow), who is deeply missed by the database world, which remembers him with fondness and respect for both his professional brilliance and his warm personal qualities. Jim Gray is responsible for several fundamental database technologies, especially in online transaction processing. Jim Gray is still missing after embarking on a solo one-day boating trip from San Francisco on January 28, 2007, to immerse his mother's ashes at sea. In 1997 Jim Gray received the A.M. Turing Award (which is considered by some to be the Nobel Prize for computer science) for his "seminal contributions to database and transaction processing research and technical leadership in system implementation." Jim Gray is the author of Transaction Processing: Concepts and Techniques, which has been the classic reference in the field for the last several years. Much of what we do in online transaction processing today flows directly from Jim Gray's seminal contributions, and all of us who work with relational databases owe an immense debt to him.

-Sam R. Alapati

I dedicate the completed endeavor of this book to my parents, Wan Kyu and Chong Sik Kim, who made incredible sacrifices for my sisters and me. I thank you for my upbringing, education, work ethic, and any and all accomplishments. Thank you for exemplifying what it means to be a follower of Christ. As a parent myself now, I know that you are truly good and Godly parents.

—Charles Kim

## **Contents**

Acknowledgment	s	xxi
CHAPTER 1	Installing, Upgrading, and Managing Change	1
	New Features in Server Installation	
	Changes in the Optimal Flexible Architecture	
	Changes in the Install Options	
	New Oracle Database 11 <i>g</i> Components	
	Role and Privilege Changes	
	Installing Oracle Database 11 <i>g</i>	
	New Features in Database Creation	
	New Initialization Parameters	
	DBCA Enhancements	
	New Oracle Background Processes	
	New Oracle-Supplied PL/SQL Packages	
	Upgrading to Oracle Database 11 <i>g</i>	
	Upgrading and the Compatibility Factor	
	Upgrade Path to Oracle 11g	
	Upgrading with the DBUA	
	Performance Testing the Upgrade	
	Downgrading After an Upgrade to 11 <i>g</i>	
	Rolling Upgrade Enhancements	
	Oracle Clusterware Upgrade	
	Real Application Testing	
	Database Replay	
	The SQL Performance Analyzer	
	Database Software Patching	
	New Features in Database Control for Patching	
	Emergency Hot Patching (Online Database Patching)	
	Database Change Management Pack	
	Software and Database Cloning	56

CHAPTER 2	Database Diagnosability and Failure Repair57
	The Fault Diagnosability Infrastructure
	Incident Packaging Service
	Structure and Location of the ADR
	Investigating and Resolving Problems
	Using the Command-Line Tool adrci
	The Support Workbench
	Checks, Failures, and Repairs
	Types of Health Monitor Checks
	Manual Checks
	Data Recovery Advisor
	Managing the Data Recovery Advisor Through RMAN
	SQL Test Case Builder
	Improvements in Handling Data Corruption
CHAPTER 3	Database Administration99
	Database Automation
	Automatic Memory Management
	Automated Database Maintenance Tasks
	Flashback-Related New Features110
	Total Recall and the Flashback Data Archive111
	Flashback Transaction Backout
	Database Administration New Features
	Virtual Columns125
	New Data Partitioning Schemes
	Allowing DDL Locks to Wait for DML Locks128
	Explicit Locking of Tables
	Invisible Indexes
	Read-Only Tables
	Temporary Tablespace Management
	Creating an Initialization Parameter File from Memory 136
	Restore Point Enhancements
	Database Resident Connection Pooling
	Comparing and Converging Database Objects

	SQL*Plus New Features	147
	SQL*Plus Error Logging	147
	Default Settings in the SQL*Plus Executable	149
	Enhanced SQL*Plus BLOB Support	
	Online Application Maintenance	150
	Support for New Objects	150
	Enhanced Online Index Creation and Rebuild	150
	Enhanced Default Column Value Functionality	151
	Online Reorganization of Materialized Views	152
	Minimal Invalidation of Dependent Objects	152
	Oracle Advanced Table Compression Option	153
	How the New Compression Feature Works	154
	Storage and Performance Gains	154
	Implementing OLTP Table Compression	154
	Compressing Unstructured Data	155
	Enterprise Manager New Features	156
	The Availability Tab	157
	The Server Tab	157
	New Related Links	158
	LogMiner Support	159
	Database Diagnostic Pack and Tuning Pack	160
	Oracle Scheduler New Features	161
	Lightweight Jobs	162
	Remote External Jobs	163
	Scheduler Support for Data Guard	165
CHAPTER 4	Performance Management	167
	SQL and PL/SQL Performance Enhancements	168
	Automatic "Native" PL/SQL Compilation	
	Faster DML Triggers	
	Adaptive Cursor Sharing	
	New Result Caching Functionality	
	Using the Server Result Cache to Enhance Performance	
	Managing the Query Result Cache	
	PL/SQL Function Result Cache	
	Intra Unit Inlining	190

	Automatic SQL Tuning	190
	Automation of SQL Tuning in Oracle Database 11g	191
	SQL Access Advisor Enhancements	194
	Optimizer and Statistics Collection Enhancements	197
	Multicolumn Statistics	197
	Expression Statistics for Functions and Expressions	201
	Changing Statistics Preferences	202
	Keeping Statistics Pending vs. Publishing	
	Statistics Immediately	203
	SQL Plan Management (SPM)	207
	ADDM Enhancements	214
	AWR Baselines	217
	Baseline Templates	219
	Adaptive Baseline Metric Thresholds	221
	Performance-Related Changes in Database Control	222
	Customized Performance Page	222
	Average Active Sessions	223
	ADDM Performance Analysis	223
CHAPTER 5	Database Security	225
	Enterprise Database Security Concerns	225
	Stronger Password Hash Algorithm	
	Security Out of the Box	
	Delayed Failed Logins	
	Case-Sensitive Passwords	
	Basic Compliance with Industry Security Recommendations	230
	Upgrade Implications	
	Password Versions	231
	Password Versions	
		232
	Case-Sensitive Password Files	232
	Case-Sensitive Password Files	232 232 233
	Case-Sensitive Password Files	232 232 233 234
	Case-Sensitive Password Files Change Default User Passwords Database Links and Case Sensitivity Password Management	232 232 233 234 239
	Case-Sensitive Password Files Change Default User Passwords Database Links and Case Sensitivity Password Management Tablespace Encryption	232 232 233 234 239 240
	Case-Sensitive Password Files Change Default User Passwords Database Links and Case Sensitivity Password Management Tablespace Encryption Creating the Oracle Wallet	232 232 233 234 239 240

	Enterprise Manager Integration	244
	Transparent Data Encryption with Enterprise Manager	
	Database Console	245
	Tablespace Encryption with Database Console	245
	Policy Trend Overview	247
	Additional Security Management Integration in	
	Database Console	248
	UTL_ Package Network Access Management	248
	Fine-Grained Access Control for UTL_* Network Packages	249
	sysasm Privilege for Automatic Storage Management	258
	LOB Encryption Enhancements	258
	Data Pump Encryption	258
	RMAN Virtual Private Catalog	258
	RMAN Backup Shredding	258
	TDE with LogMiner Support	258
	TDE with Data Guard SQL Apply	
	Oracle Audit Vault	
	TDE with Hardware Security Module Integration	
	Oracle Advanced Security Features	
	Kerberos Cross-Realm Support	
	sysdba Strong Authentication	
	Oracle Call Interface Enhancements	
	Set the Level of Information Captured for Bad Packets	262
	Delay or Drop Database Connections	
	Configure Maximum Number of Server Connection Attempts.	
	Control the Display of Database Release Information	
	Set Up the Banner and Auditing for Unauthorized Access	
CHAPTER 6	Backup and Recovery	265
_OHAI IEH O	Buokup unu noootory	200
	Enhanced Block Media Recovery	265
	Preconditions for Using the recover block Command	266
	Using the recover block Command	267
	RMAN Management Enhancements	270
	Scripting with RMAN Substitution Variables	270
	New RMAN Configuration Parameters	273
	Backing Up Large Files in Sections	274
	Creating Archival (Long-Term) Backups	276
	The New Validate Command	281
	Configuring an Archived Redo Log Deletion Policy	285
	Archived Redo Log Failover	287

	Backup Shredding	288
	Optimized Backing Up of Undo Data	288
	Active (Network-Based) Database Duplication	288
	Prerequisites	289
	Necessary Spfile Modifications	290
	Performing Active Duplication	292
	How Network-Enabled Duplication Works	297
	Recovery Catalog Management	299
	Merging Recovery Catalogs	299
	Moving a Recovery Catalog to Another Database	302
	Virtual Private Catalogs	302
	Enhanced RMAN Integration with Data Guard	307
	Configuring RMAN Without a Database Connection	308
	Restoring a Backup Controlfile to a Standby Controlfile	309
	Resynchronizing the Recovery Catalog	310
	Backup File Accessibility Groups	310
	Block Change Tracking Support in Standby Databases	311
CHAPTER 7	Data Pump	313
	API Enhancements	313
	Compression Enhancements	314
	Encryption	319
	Specifying Encryption	319
	Choosing an Encryption Mode	320
	Reusing a Dump File	322
	Remapping Data	323
	Remapping a Table	325
	Export and Import of Partitions	326
	Ignoring Errors	329
	External Tables Based on Data Pump	329
	Stored Procedure to Generate External Table Using a	
	Data Pump	331
CHAPTER 8	Oracle Streams	337
	Synchronous Capture	338
	Synchronous Capture	
		338

	Combined Capture and Apply	342
	Requirements for Combined Capture and Apply	342
	Combined Capture and Apply Validation	343
	Performance Advisor	
	Streams Advisor Admin Package	344
	Streams Topology	345
	Streams Topology Views	346
	DBMS_COMPARISON for "Compare and Repair"	
	DBMS_COMPARISON Requirements	348
	Supported Database Object Types	348
	Comparison	349
	Comparison Maintenance	350
	Rechecking a Prior Comparison	351
	Converging Shared Database Objects (Repair)	352
	Splitting and Merging of a Destination	
	Splitting a Stream	354
	Merging the Streams	354
	Merge Streams Job	355
	Usability Improvements	355
	Message Tracking	355
	Automated Alerts for Clients and Thresholds	356
	Identifying Newly Supported Tables View	357
	Identifying Minimum Required Checkpoint SCN	357
	Background Process Name Changes	357
	Support for XMLType Values Stored As CLOBs	358
	Support for Transparent Data Encryption	358
	Support for Oracle Scheduler	359
CHAPTER 9	Storage Management	361
	Automated Storage Management	361
	Misconceptions of ASM	
	RMAN and ASM	
	sysasm Privilege and osasm Group	
	Fast Rebalance	
	ASM Upgrade	
	Upgrading Manually	
	Upgrading Using DBUA	
	Rolling Upgrades	

	ASM Preferred Reads	374
	Preferred Read Setup	374
	Monitoring Preferred Reads	375
	ASM Restricted Mode	376
	Diskgroup Attributes	381
	Allocation Unit (AU) Sizes	385
	RDBMS and ASM Compatibility	386
	Fast Mirror Resync	389
	asmcmd Commands	395
	ls	395
	lsdg	395
	lsct	396
	lsdsk	396
	cp	398
	Metadata Backup and Restore	400
	Backup Diskgroup Using md_backup	400
	Restore Diskgroup Using md_restore	401
	Metadata Backup and Restore Demonstration	402
	Additional md_restore Examples	409
	Bad Block Recovery with ASMCMD	409
	Oracle Direct NFS	410
	Set Up Direct NFS	410
	Validate Direct NFS	412
	Disable Direct NFS	413
	Network Interface Card Bonding	
	Direct NFS Performance	413
CHAPTER 10	Data Guard	415
	Active Physical Standby Database Duplication	
	Real-Time Query Standby	
	Start the Real-Time Query Standby	
	Validate the Real-Time Query Standby Database	
	Design the Real-Time Query Database	
	Snapshot Standby	
	Convert to Snapshot Standby	
	Convert Back to Physical Standby	
	Using the Physical Standby for Rolling Upgrades	
	Prepare the Primary Database	
	Convert to Logical: Keep Your Identity	427

	Improvements in Redo Transport	428
	Block Change Tracking Support	428
	RMAN Understands Data Guard Configurations	429
	Improved Integration with RMAN	429
	Compressed Redo Traffic	429
	Usage of Histograms for the NET_TIMEOUT Attributes	430
	Fast-Start Failover for Maximum Performance Mode	432
	Logical Standby: SQL Apply	432
	Support for Transparent Data Encryption (TDE)	433
	Dynamically Set the Data Guard SQL Apply Parameters	434
	Support for VPD and FGA	435
	DBMS_SCHEDULER Support	435
	Logical Standby Archivelog Storage	436
	SQL Apply Event Messages	437
	Data Guard Broker	437
	Data Guard Broker Command-Line Interface	438
	Customize Fast-Start Failover Events	440
	Initiate Fast-Start Failover from Applications	441
	New Data Guard Manager Properties	442
	Detect Lost-Write Conditions Using a Physical Standby	443
	Support of Heterogeneous OS Data Guard Configuration	443
	Oracle Database 11 <i>g</i> Data Guard Over Storage	
	Vendor Solutions	444
CHAPTER 11	Application Development	445
	New PL/SQL Features	445
	CONTINUE Statement	445
	Sequences Without Dual	446
	Native Compilation	446
	SIMPLE_INTEGER	446
	Regular Expression Enhancements	
	Named and Mixed Arguments in SQL Statement PL/SQL	
	Function Calls	451
	Subprogram Inlining	
	Generalized Invocation	
	Cross-Session PL/SQL Function Result Cache	
	Bulk In-Bind Table of Records in FORALL	
	Dynamic SQL Symmetry and New Functionality	465

	New Trigger Features	469
	Trigger Ordering: The FOLLOWS Clause	469
	Creating Triggers As ENABLED or DISABLED	469
	Compound Triggers Type	469
	XML DB Improvements	475
	Repository Events	475
	Support Content Repository API for Java: JSR-170	475
	ACL Security	
	New XMLType	475
	XMLIndex	481
	Native Web Services for Oracle XML DB	493
	XQuery Enhancements	500
	XML Developer's Kit (XDK) Improvements	
	Application Express (APEX) Enhancements	
	APEX Configuration	
	APEX Enhancements	
	PHP Support Enhancements	
	Java Enhancements	
	Just-in-Time (JIT) Compiler and Native Compilation	
	JAR Support	
	Improvements to the loadjava Tool	
	Improvements to the dropjava Tool	
	Improvements to the ojvmjava Tool	
	The ojvmtc Tool.	
	The ojvinic rool	312
CHAPTER 12	Data Warehousing	E1 E
UNAPIEN 12	Data warehoushiy	
	Next-Generation LOBs	516
	SecureFiles Requirements	516
	BasicFiles vs. SecureFiles	516
	LOB Performance	
	Deduplication	
	DBMS LOB.SETOPTIONS	
	Encryption	
	Compression	
	db_securefile Initialization Parameter	
	Migrate from BasicFiles to SecureFiles	
	LOB Prefetch	527

Data Warehousing New Features527
Partition Change Tracking
Materialized View Refresh Performance Improvements 529
Materialized View QUERY REWRITE Enhancements 530
Pivot Operators
Unpivot Operators537
Partitioning
Partition Advisor
Reference Partitions
Interval Partitioning546
Extended Composite Partitioning 552
Virtual Column-Based Partitioning 556
System Partitioning559
Enhanced Partition Pruning Capabilities 561
Oracle Multimedia
Enhanced DICOM Support
ORDDICOM Object Type562
Image Processing
Support for SecureFiles 562
Additional Multimedia Enhancements 563
INDEX565
